

GKV-P 200

It is used for pressing and extraction of the oil and the cake of multiple crushed oilseeds such as cottonseeds, sun Flower kernels, rapeseeds, soybeans, etc. after squeezing and cooking in the cooker.
The expeller type oil press is designed as a rigid structure all steel frame, guarantees a very long life for the machine. Worm assemblies and special hard-wearing materials used in the construction provide to get the desired oil ratio on the cake and to reach the machinery's full potential.
