

Polishing Machine
GMBP

Before

After

This system which has been designed and projected by GBS Ascom R&D Department is being used to give natural yellow color and shiny appearance to hulled and broken bulgur particles with Full Automatic PLC Controlled Units. While polishing process bulgur particles gains natural yellow color and their surfaces are grinded to give oval shape. This system has been manufactured by using the latest technology with the aim of achieving more capacity with the lowest energy consumption. While designing process occupational health and safety assessment rules carried out with great care. Also a Touch-Screen Panel mounted in front face to Access all settings and directions easily by touching screen only.

Model	Dimensions (mm)				Motor (Kw)	Capacity (kg/h)	Weight (kg)	Transport Area (m ²)
GM-BP 210/5	A	B	C	D	55 - 0.75	1500	1500	3.00
	1800	1565	1020	2690
