Manufacturing Production Lines

GPS as-com Company is an American Company and its Head Office is in California Works in the Fields of Industry and Trade Including Food and Engineering Sector.

In 2009 it Bought 25% Shares of Some Turkish Factories to Produce Machines Which Allowing it the Opportunity to Manage the Sales of These Factories All Over the World.

GPS-ASCOM

3 ▶ **SEPARATOR
DTMA**

Separator for mill and silo used for separating straw, garbage, spikes and unwanted strange particles from the cereals in post and mill parts. Different models are available as to the capacities of factories.

It moves by eccentric system and used very effective eliminating and separating process. Machine dimensions are very small with respect to its capacity. Two folded tambour are suspended at four corners of metallic elastic rods on the chassis, which is made of steel sheets. Motor is assembled on the special system balanced with flywheel circular by the help of V- Belt, thus machine to work. It keeps the particles bigger than wheat over filter then thrown away by the slide way. Wheat falls down through the over filter to bottom filter; and strange particles are filtered out of wheat. Filter can be easily compressible by the help of four side of the tambour with special fixing system at the same time easily removable. Filters are made of two parts on each floor and where removed there isn't any problem for place. There are rubber balls which cleans interior of the filter. If more cleaning air is required, extra air canal can be connected to exit part of the machine. Air Canal spreads the product that comes to riddle separated from light particles by setting with current air speed.

SLT-01 is a full automatic salting machine, which has the property of salting/flavoring all kinds of nuts. Body is completely rustproof and can be cleaned easily.

It is used to select the strange, rotten and bruised ones in the product.

- Its body is made of stainless steel
- It has canals to put the bruised product
- The band is suitable for the food
- The speed of the band can be adjusted
- It has superior ergonomic design.

Meters	Electrical Power	Apprximate
3-6-9-12 m.	0.75 KW	400 kg

CAPACITY				
Sunflower Seed	Yellow Roasted Chickpeas	Peanut in shell	Salted Chickpeas	Pimpkin Seed
240 kg/h	600 kg/h	240 kg/h	400 kg/h	400 kg/h

Classic type rotating roasting oven, which roasts chickpea, seeds, peanuts etc.
It is suitable for shops and small organizations.

COOLAIR CIRCULATION

- Roasting ovens are manufactured as horizontal type with the capacity of between 50kg/h and 6000 kg/h
 - These ovens having the most appropriate system for roasting process of every kind of dried-nuts can also be used for drying vegetables, fruits and other fresh products.

HOT AIR CIRCULATION

This machine is used specially for coating peanuts, chickpea, almonds and sunflower seeds. It serves you perfect products for marketing.

This machine is used specially for coating peanuts, chickpea, almonds and sunflower seeds. It serves you perfect products for marketing.

can be made from copper or inox (AISI304)

can be added heating system

speed of rotating can be regulated

suitable for tasting new recipes before starting mass production

SLT-03 is a manual salting machine, which has the property of salting/flavoring all kinds of nuts. Body is completely rustproof and can be cleaned easily.

Capacity					
Peanut	Sunflower Seed	Peanut in Shell	Chickpea	Pistachio	Kaju
1000 kg/h	800 kg/h	500 kg/h	800 kg/h	800 kg/h	600 kg/h

Elevators help to carry the product to desired height without any damage and is appropriate to the food codex.

The machines are produced according to CE and ISO 9001:2008 quality standards by expert staff, also all used parts have CE world standards certificate such as motors, all metals used in producing are inox AISI 304 quality.
